Projects

Tea-commerce

tea-commerce-app.herokuapp.com | github

eCommerce website for tea built with the MERN stack

- Implemented MongoDB to store product, user and order information and Cloudinary for images.
- Integrated Stripe for processing payment
- Managed state with Redux

Cocktail Finder

my-cocktail-finder.netlify.app | github

App that searches the CocktailDB API and provides information on drinks and ingredients.

- Designed with Tailwind CSS to pair effectively with React components and enhance overall look.
- Included a dark mode feature for use in darker environments.

Learning Blog

learningblogapp.herokuapp.com| github

Personal blog made with the MERN stack.

- Set up cursor pagination for the post feed, and offset pagination for managing posts in the admin dashboard.
- Posts rendered with markdown to support codeblocks, links and additional images.
- Implemented a draft system so that posts could be saved without having to be posted to the blog.

Experience

Barista

Starbucks barista | NOV 2012 - MAR 2019

- Performed basic barista duties, including making drinks, handling cash, closing and opening the store.
- Managed teams, trained fellow baristas and placed shipping orders.
